Product Overview

The HPA-100W-63+ is a high power, rack mount amplifier with a self-contained AC power supply which can be used for a wide variety of laboratory testing applications. This rugged amplifier is capable of amplifying signals up to 100W output power over its entire operating bandwidth of 2500 to 6000 MHz. Built-in safety features include fans alarms and automatic shut down mechanism to prevent damage in the event of excessive internal temperatures. The amplifier's output stage is further protected in the event of a fault condition, allowing high power operation for up to 5 minutes into an open or short load (refer to the maximum input power specifications).

Key Features

Feature	Advantages
Wideband frequency range	2500 to 6000 MHz bandwidth covers popular wireless communications, SATCOM and radar bands in a single instrument, useful for many test applications.
100W output power at saturation	Supports high power test applications such as EMI, max power handling, and reliability testing
High Gain	58 dB typical gain allows the HPA-100W-63+ to be driven to full output power with nearly all commercially available signal generators
High Reverse Isolation	Insulates load reflections to protect sensitive signal sources from potential damage and performance variation due to load pulling
A/C Power	Operating from standard AC line power supply - the HPA-100W-63+ can be powered from 85-264V at 47~63 Hz making this HPA versatile in supporting global markets
Cooling system	Front to back forced air cooling fans makes this ideal for usage in test equipment racks.
Built-in protections	The unit shuts OFF when the internal amplifier reaches a set temperature of 85±5°C, preventing damage to the amplifier and providing added reliability.
CE marked	Meets conformity standards for sale within the European Economic Area (EEA).
