PRODUCT OVERVIEW

Mini-Circuits' LFCN-3602+ is a miniature low-temperature co-fired ceramic (LTCC) low pass filter with a DC to 36 GHz passband that supports a variety of applications. This model provides 2.9 dB typical insertion loss over a wide band, due to its rugged monolithic construction. Housed in a small 1206 ceramic form factor, the filter is ideal for dense signal chain PCB layouts, where it complements MMIC size and performance. The LTCC fabrication process assures minimal RF performance variation while delivering a product that is well-suited for environmental extremes of high humidity and temperature.

KEY FEATURES

Feature	Advantages
Ultra-Wide Stopband	Provides excellent stopband rejection to 67 GHz, suitable for wideband applications.
LTCC Construction	The use of LTCC technology allows for repeatable performance in a rugged ceramic package, well suited for tough environments such as high humidity and temperature extremes. See Mini-Circuits Environmental Rating ENV06T10 for more information.
Excellent Performance for Size	Offers best in class performance relative to larger-size alternative technologies. This mmWave multi-layer surface mount LTCC filter in a 1206 package allows for space to be saved in dense circuit board layouts, while also minimizing the effects of parasitics.
