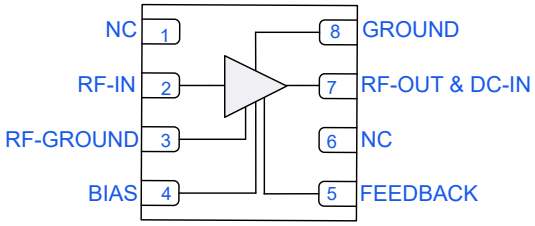
FUNCTIONAL DIAGRAM



PRODUCT OVERVIEW

The PMA2-252LNA+ is an E-PHEMT amplifier that operates from 1500 to 2500 MHz. The amplifier has a low noise figure of 0.8 dB typical while providing 17.6 dB of gain, +30 dBm OIP3, and +17.8 dBm P1dB with 18 dB typical return loss from a +4V supply drawing 57 mA. Gain is adjustable across the operating bandwidth by changing the external feedback resistor R1. The amplifier is housed in an industry standard 2x2mm SMT package, with RF ports internally matched to 50Ω, facilitating easy integration into microwave system PC boards.

KEY FEATURES

Feature	Advantages
Ultra Low Noise Figure • Typ. 0.8 dB	Excellent noise figure performance.
High OIP3 • OIP3, Typ. +30 dBm	Suitable as a driver amplifier in receiver/transmitter chains.
Adjustable Gain, 14.5 to 17.6 dB	By changing the feedback resistor R1, the device gain may be adjusted to optimize the signal chain.
Max Input Power, +27 dBm	Ruggedized design operates up to high input power often seen at receiver inputs eliminating the need for an external limiter.
2x2mm 8-Lead SMT package	Small footprint saves space in dense layouts while providing low inductance, repeatable transitions, and excellent thermal contact to the PCB.

a. Suitability for model replacement within a particular system must be determined by and is solely the responsibility of the customer based on, among other things, electrical performance criteria, stimulus conditions, application, and compatibility with other components and environmental conditions and stresses.
b. The Avago MGA-632P8 part number is used for identification and comparison purposes only.
