

Low Noise Amplifier

RAMP-33LN+

50Ω 50 to 3000 MHz

The Big Deal

- Low Noise Figure, 1.1 dB typ.
- Wide bandwidth, 50 to 3000 MHz
- High IP3, 30 dBm typ.
- Integrated Bias Matching and Stability Circuits

CASE STYLE: CK605

Product Overview

The RAMP-33LN+ (RoHS compliant) utilizes advanced E-PHEMT technology in a single stage low noise amplifier design built into a shielded case (size: .500"x.500"x.180"). The drop-in module offers low noise figure and high output IP3 over the full bandwidth of 50 to 3000MHz, without the need for external matching components. This amplifier supports a wide variety of applications requiring moderate power output, low distortion and 50 ohm matched input/output ports.

Key Features

Feature	Advantages
Wide band high dynamic range	The RAMP-33LN+ covers a wide spectrum of application frequencies from VHF through 'S' band. When combined with the output power and IP3, this amplifier supports a broad array of systems and test applications.
Low NF	With typical 1.1dB NF, the RAMP-33LN+ enables greater sensitivity for receiver applications. It includes all matching and stability circuits making this Drop-in LNA module a turn-key solution for ensuring system sensitivity in demanding applications.
High Output IP3	At +30 dBm IP3, in combination with its low noise performance, the RAMP-33LN+ can improve a systems' spur-free dynamic range which is often the critical driver in many receiver applications.
Power In at 1dB Comp.: +1dBm typ. Input no damage, +13dBm	Provides a good safety margin against damage or saturation from unwanted high power RF signals present at the input to a receiver.
Drop-in Module	Eliminates the need for designers to optimize low noise transistor bias and matching circuitry. The RAMP-33LN+ provides the outstanding combined performance and does not require any external elements. The case PCB area is smaller than most LNA transistor designs with external circuitry.
Metal Case	Provides a protective enclosure improving handling robustness in addition to shielding this sensitive high gain device from close by circuitry.
Unconditionally stable	No adverse effects due to loading of the input and output ports avoiding potential instability which can be a critical requirement when integrating high gain, high frequency devices on an open PCB assembly.

Surface Mount Low Noise Amplifier

RAMP-33LN+

50Ω

50 to 3000 MHz

Features

- Wide bandwidth, 50 to 3000MHz
- Low noise figure, 1.1 dB typ.
- Output power, up to +16.5 dBm typ.
- Good output IP3, 30 dBm typ.
- Unconditionally stable

Applications

- Front-end amplifier
- Cellular
- GPS
- Bluetooth

CASE STYLE: CK605
PRICE: \$19.95 ea. QTY (1-24)

+RoHS Compliant

The +Suffix identifies RoHS Compliance. See our web site for RoHS Compliance methodologies and qualifications
