PRODUCT OVERVIEW

Mini-Circuits' RCM-1SP8T-40 is an electro-mechanical SP8T switch operating over an exceptionally wide bandwidth from DC to 40 GHz with high isolation and low insertion loss. The absorptive switch is fail-safe / normally open, with a break before make configuration, and lifetime of 2 million switching cycles when used within the noted specifications.

The switch is housed in a compact benchtop package with all 2.92 mm (female) RF connectors on the front along with LED indicators for a quick read out of switch states. Control and power connections are located on the rear panel.

The switch assembly can be controlled via USB or Ethernet (supporting HTTP and Telnet network protocols). Full software support is provided, including our user-friendly GUI application for Windows and a full API with programming instructions for Windows and Linux environments.

KEY FEATURES

Feature	Advantages
Mechanical switch	Mechanical absorptive switches provide low loss, high isolation, high reliability, repeatable performance and internal termination of input signals on the disconnected paths
Fail-safe design	The switches revert to a known default state when the DC supply is removed, allowing their use in systems that must continue to operate safely in the event of power failure
Ethernet & USB control	USB HID and Ethernet (HTTP & Telnet) interfaces ensure compatibility with most software environments and connection requirements.
Integrated control & power	Easy to use on the lab bench or integrate into larger automated test systems without the need to develop custom control systems.

1. Isolation measured between Com and any disconnected port. Example: Isolation for Com to 1 is the leakage measured at port 1 from a signal input at Com when the active switch path is set to Com to 2

2. Return loss into Com when active or ports 1-8 in any state; Com is reflective when disconnected

3. Maximum power into any internal termination is 1W per port, 3W total per switch

4. Hot switching power above this level will degrade the switch lifetime
