PRODUCT OVERVIEW

Mini-Circuits' TCP-2-23-75X+ is a 75Ω 2-way 0˚ surface-mount power splitter/combiner covering the 5 to 2150 MHz frequency range, supporting bandwidth requirements for DOCSIS® 4.0 systems and equipment, as well as other broadband applications. This model can handle up to 0.5W RF input power as a splitter, and provides low insertion loss and low phase and amplitude unbalance. It features core and wire construction mounted on a 6-pad printed laminate base with gold over nickel termination finish. The unit measures .166" x .166" x .140" with Mini-Circuits' TopHat® feature to improve speed and accuracy of pick and place assembly. This design requires external capacitors, resistor and inductors for impedance matching and cycling isolation between the output signals (refer to electrical schematic).
