## WVBP Series

50Ω Frequency Bands from: 27 to 86 GHz

### The Big Deal

- Precision Machining and Plating
- Outstanding Return Loss
- Super-High Rejection & Fast Roll-Off

### Product Overview

Mini-Circuits and Virginia Diodes have teamed together to offer a new series of high-performance, high-fidelity waveguide bandpass filters for millimeter wave applications. WVBP-series filters are available in various bands spanning 27 to 86 GHz and are offered with standard WR waveguide interfaces. Built with precise machine tolerances and outstanding quality plating, WVBP-series filters provide low insertion loss in the passband, outstanding return loss, and high stopband rejection with fast roll-off.

WVBP-series waveguide bandpass filters are built upon Virginia Diodes' distinguished experience developing metrology-grade equipment for millimeter-wave and THz bands, bringing leading-edge capabilities to Mini-Circuits customers working in high-frequency applications.

#### About Virginia Diodes, Inc.

Virginia Diodes, Inc. develops and manufactures devices, components and systems for the millimeter-wave and terahertz frequency bands. This includes direct detectors, frequency mixers and multipliers, receiver systems, and sources operating to frequencies as high as five terahertz. Test and Measurement products include frequency extenders for the range from 26 GHz to 1.5 THz for Vector Network Analyzers, Spectrum Analyzers and Signal Generators. VDI also offers select passive components, including high frequency waveguide filters, which have been developed to enable high-quality measurement systems throughout this emerging frequency band.
