PRODUCT OVERVIEW

Mini-Circuits' Z4BT-2R15GW+ is a combination of bias tee and diplexer designed to support L-B and communications application.Ideally suited for satellite communication installations, the Z4BT-2R15GW+ combines wide band, flat response bias tee performance with additional functionality to inject 100MHz reference clock in a single compact design. Built in a rugged shielded case, the Z4BT-2R15GW+ is equipped with SMA, BNC Female connectors for all ports.
The Z4BT-2R15GW+ is ideally suited for powering Satellite up converters and LNBs where IF, DC and 100MHz clock reference are all injected on a single coax cable.
