PRODUCT OVERVIEW

The ZHL-20W-83-S+ is a Class AB, high-power amplifier providing 20W saturated power over the 4000 to 8000 MHz band, ideal for a variety of high-power test setups as well as applications including communications, radar and more. The ruggedly-designed amplifier provides unconditional stability and built-in self-protection against reverse polarity and overheating. The amplifier's output stage is further protected in the event of a fault condition, allowing high power operation for up to 2 minutes into an OPEN or SHORT up to 15W output power. Housed in a rugged aluminum alloy case measuring 4.3 x 6.7 x 1.4", the unit features SMA connectors and optional heat sink and fan attachment for cooling.

KEY FEATURES

Feature	Advantages
Wideband, usable from 4000 to 8000 MHz	Suitable for a broad range of high-power, wideband applications, including test setups, communications and defense applications.
High Gain, 56 dB typ.	Enables signal amplification to 20W output without the need for multiple gain stages.
Built-in self-protection	In instances of potentially-damaging overheating within the housing an automatic sensing feature signals the unit to power down.
Unconditional Stability	Provides reliable performance independent of input and load conditions.
Ruggedness	Able to operate into an open and short for 2 minutes at 15W output power.
