

Mechanical Switch Assembly **ZT-2SP6T-12DPS**

THE BIG DEAL

- 2 x mechanical SP6T absorptive switches
- Dual redundant power supply
- Convenient rack-mountable chassis
- Fail-safe / redundancy switching
- LED switch state and power supply indicators

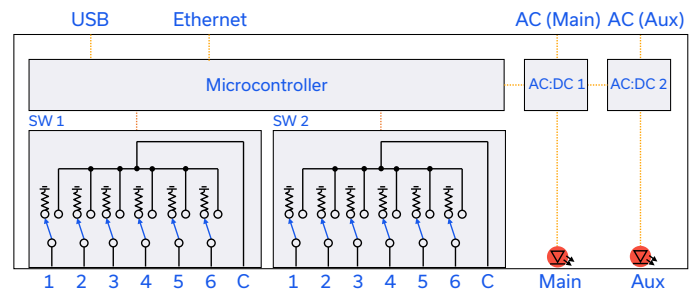

Generic photo used for illustration purposes only

APPLICATIONS

- Benchtop and rack-mounted automated test systems
- 5G FR1, WiFi 6E MIMO, UWB, Bluetooth
- Military radio, radar & electronic warfare
- Microwave radio & cellular infrastructure
- Switch matrices

FUNCTIONAL BLOCK DIAGRAM

PRODUCT OVERVIEW

Mini-Circuits' ZT-2SP6T-12DPS houses 2 independently controlled electro-mechanical SP6T switches. Each switch operates over a wide bandwidth, from DC to 12 GHz with high isolation and low insertion loss. The absorptive switches are failsafe, with a break-before-make configuration, and lifetime of 10 million switching cycles when used within the noted specifications.

The switches are housed in a compact 19-inch rack chassis, 2U height, with all SMA (female) RF connectors on the front. LED switch state indicators on the front panel enable visual display of all switch states. The switch assembly can be controlled via USB or Ethernet (supporting HTTP and Telnet network protocols). Full software support is provided, including our user-friendly GUI application for Windows and a full API with programming instructions for Windows and Linux environments.

The system includes a dual redundant power supply configuration which ensures reliable long-term operation in environments where interruptions in service cannot be tolerated. Connecting the two AC power supply inputs to separate AC sources ensures the system can continue operation in the event of a failure in either one of them. The system will seamlessly transition to the auxiliary AC source in the event of an interruption to the main source and then back when the main source is restored; all without any interruption or down time to switch operation and communication.

KEY FEATURES

Feature	Advantages
Mechanical switches	Mechanical absorptive switches provide low loss, high isolation, high reliability, repeatable performance and internal termination of input signals on the disconnected paths
Dual redundant power supply	Separate internal power supply units and connections for 2 separate external AC sources ensure reliable operation. The system will seamlessly switch between the main and auxiliary AC inputs in the event of a failure in either source, with no downtime or interruption to operation.
Fail-safe design	The switches revert to a known default state when the DC supply is removed, allowing their use in systems that must continue to operate safely in the event of power failure
Ethernet & USB control	USB HID and Ethernet (HTTP & Telnet) interfaces ensure compatibility with most software environments and connection requirements.
Rack-mount chassis	Compact 2U height, 19" rack-mountable chassis suits integration in automated production test environments.

Mechanical Switch Assembly **ZT-2SP6T-12DPS****ELECTRICAL SPECIFICATIONS AT +25°C (EACH SWITCH)**

Parameter	Conditions	Min.	Typ.	Max.	Units
Frequency Range		DC		12	GHz
Insertion Loss	DC – 6 GHz		0.15	0.25	dB
	6 – 8 GHz		0.20	0.30	
	8 – 12 GHz		0.25	0.45	
Isolation (Inactive Paths) ¹	DC – 6 GHz	80	95		dB
	6 – 8 GHz	80	90		
	8 – 12 GHz	80	90		
Return Loss ²	DC – 6 GHz		20		dB
	6 – 8 GHz		20		
	8 – 12 GHz		20		
Switching Time			25		ms
RF Input Power (Cold Switching)	Through path			20	W
	Into internal termination			1	
Switch Lifetime	100 mW hot switching ³	10			million cycles
	1W hot switching		1		

1. Isolation measured between Com and any disconnected port. Example: Isolation for Com to 1 is the leakage measured at port 1 from a signal input at Com when the active switch path is set to Com to 2

2. Return loss into Com when active or ports 1-6 in any state; Com is reflective when disconnected

3. Hot switching power above this level will degrade the switch lifetime

Mechanical Switch Assembly **ZT-2SP6T-12DPS****CONTROL INTERFACES**

Ethernet Control	Supported Protocols	TCP / IP, HTTP, Telnet, DHCP, UDP (limited)
	Max Data Rate	10 Mbps (10 Base-T Half Duplex)
USB Control	Supported Protocols	HID – Full Speed
	Min Communication Time ¹	3 ms typ

1. Based on the polling interval of the USB HID protocol (1 ms with 64 bytes per packet) and no other significant CPU or USB activity

SOFTWARE & DOCUMENTATION

Mini-Circuits' full software and support package including user guide, Windows GUI, API, programming manual and examples can be downloaded free of charge (refer to the last page for the download path).

A comprehensive set of software control options is provided:

- GUI for Windows – Simple software interface for control via Ethernet and USB
- Programming / automation via Ethernet
 - Complete set of control commands which can be sent via any supported protocol – simple to implement in the majority of modern programming environments
- Programming / automation via USB
 - DLL files provide a full API for Windows with a set of intuitive functions which can be implemented in any programming environment supporting .Net Framework or ActiveX
 - Direct USB programming is possible in any other environment (not supporting .Net or ActiveX)

Please contact testsolutions@minicircuits.com for support

MINIMUM SYSTEM REQUIREMENTS

Hardware	Intel i3 (or equivalent) or later
GUI (USB or Ethernet Control)	Windows 7 or later
USB API DLL	Windows 7 or later with support for Microsoft .Net Framework or ActiveX
USB Direct Programming	Windows 7 or later; Linux
Ethernet	Windows, Linux or macOS with Ethernet TCP / IP support

PROGRAMMING COMMANDS

The key ASCII / SCPI commands for control of the system for control via the Ethernet or USB API are summarized below (refer to the programming manual for full details):

Command / Query	Description
:MN?	Read model name
:SN?	Read serial number
:FIRMWARE?	Read firmware version
:C[sw_number]=[port]	Set a single switch state: <ul style="list-style-type: none"> • [sw_number] = Switch number (1 to 2) • [port] = The port to be connected to Com of the specified switch (1 to 2) • Example :C1=2
:GetSSW1[sw_number]?	Get the state of a switch: <ul style="list-style-type: none"> • [sw_number] = Switch number (1 to 2) • Example :GetSSW1
:PSU:[psu_number]?	Check the power supply status <ul style="list-style-type: none"> • [psu_number] = 1 for main power supply or 2 for auxiliary power supply • Returns an integer to indicate whether the power supply is connected (1 for connected and available, 0 for disconnected / not available) • Example :PSU:1? Note: Power will always be drawn from the main power supply input when available

**GRAPHICAL USER INTERFACE (GUI) FOR WINDOWS - KEY FEATURES**

- Connect via USB or Ethernet
- Run GUI in "demo mode" to evaluate software without a hardware connection
- View and set all switch states at the click of a button
- View dual redundant power supply operation
- Configure Ethernet settings
- Update firmware

System Status

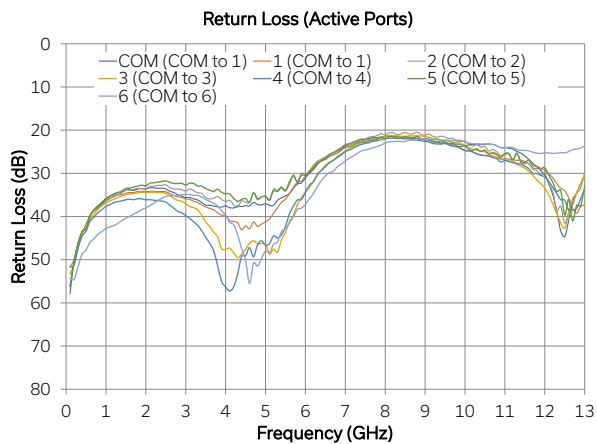

Temperature	Normal
Fan operation	OK
Fan state	OFF
Main PSU	In use
Aux PSU	Available

- The GUI includes notifications to confirm which AC inputs (Main and Aux) are connected:

Notification	Description
In Use	The AC input (either Main or Aux) is connected and currently in use for powering the system
Available	The Aux AC input is connected and currently in standby mode (the Main AC input is powering the system)
Not Available	The AC input (either Main or Aux) is not detected, due to a physical disconnection or fault

TYPICAL PERFORMANCE GRAPHS

Mechanical Switch Assembly **ZT-2SP6T-12DPS**

ABSOLUTE MAXIMUM RATINGS

Parameter	Conditions	Limits	Units
Temperature	Operating	0 to +50	°C
	Storage	-20 to +60	
Input Power (No Damage)	Cold switching	20	W
	Hot switching	1	
	Into internal termination	1	

Permanent damage may occur if any of these limits are exceeded. Operating in the range between operating power limits and absolute maximum ratings for extended periods of time may result in reduced life and reliability.

POWER SUPPLY

Power Supply	Dual redundant AC mains input: 2 x 100-240 V, 50 / 60 Hz
Fuse	2A, 250V rating per power supply
Power Consumption	150W maximum

SWITCH STATE TABLE

Switch Command	Switch Path
:SP6T:x:STATE:0	All ports disconnected
:SP6T:x:STATE:1	COM to 1
:SP6T:x:STATE:2	COM to 2
:SP6T:x:STATE:3	COM to 3
:SP6T:x:STATE:4	COM to 4
:SP6T:x:STATE:5	COM to 5
:SP6T:x:STATE:6	COM to 6

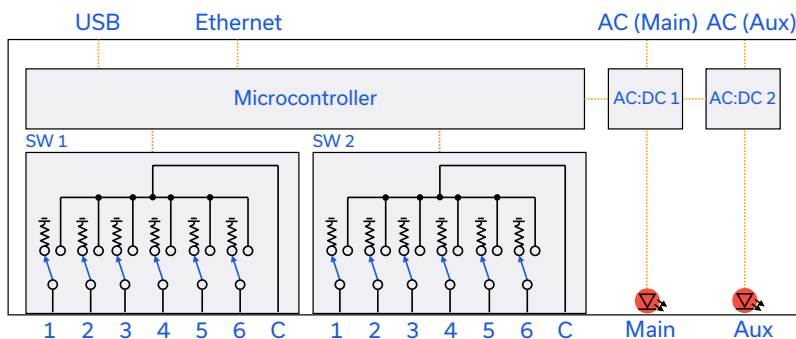

x = switch number (1 to 2)

CONNECTIONS

Port	Connector
COM & 1-6 (each SP6T)	SMA female
USB	USB type B
Ethernet / LAN	RJ45
Main AC Input	IEC C14 inlet
Aux AC Input	IEC C14 inlet

COM = Common port
1-6 = input / output ports

Environmental Specifications ENV55

All Mini-Circuits products are manufactured under exacting quality assurance and control standards, and are capable of meeting published specifications after being subjected to any or all of the following physical and environmental test.

Specification	Test/Inspection Condition	Reference/Spec
Operating Temperature	-0° to 50° C Ambient Environment	Individual Model Data Sheet
Storage Temperature	-20° to 60° C Ambient Environment	Individual Model Data Sheet
Operating and Storage Humidity	5% to 85% RH (non-condensing)	Ambient
Bench Handling Test	Bench Top Tip 45° & Drop	MIL-PRF-28800F
Transit Drop Test	Free Fall Drop, 20 cm (7.9 inches)	MIL-PRF-28800F Class 3
