

## THE BIG DEAL

- 4 x mechanical SP8T absorptive switches
- Excellent performance to 26.5 GHz
- Convenient rack-mountable chassis
- Ethernet & USB control

## APPLICATIONS

- Benchtop and rack mounted automated test systems
- 5G FR1, WiFi 6E, UWB, Bluetooth
- Military radio, radar & electronic warfare
- Test & measurement systems
- Fail-safe / redundancy switching

## PRODUCT OVERVIEW

Mini-Circuits' ZTM-4SP8T-26 comprises 4 independently controlled, electro-mechanical SP8T switches. Each switch operates over a wide bandwidth, from DC to 26.5 GHz, with high isolation and low insertion loss. The absorptive switches are of a failsafe / normally open and break-before-make-configuration with a lifetime of 2 million switching cycles when used within the noted specifications.

The switch system is housed in a rugged 19" rack chassis, 3U height, with all SMA (f) RF connectors and LED switch position indicators on the front panel. The modular design of the ZTM series switch rack supports easy maintenance and re-configuration in the field, without the need to return the whole system to a Mini-Circuits facility.

The switches are controlled via USB or Ethernet, allowing control directly from a PC, or remotely over a network. Full software support is provided, including our user-friendly GUI application for Windows and a full API with programming instructions for Windows and Linux environments (both 32-bit and 64-bit systems).

Custom switch configurations can be configured to fit any requirement, using Mini-Circuits' online configurator tool at [www.minicircuits.com/WebStore/ztm.html](http://www.minicircuits.com/WebStore/ztm.html).

## KEY FEATURES

Feature	Advantages
High performance switches	Mechanical absorptive switches provide high reliability, repeatable high performance, and internal terminations of input signals on the disconnected paths.
Rack-mount chassis	Compact 3U height, 19" rack-mountable chassis with RF connections on the front, suits integration in automated production test environments.
Ethernet & USB control	USB HID and Ethernet (HTTP / Telnet ) interfaces ensure compatibility with most software environments and connection requirements.
