PRODUCT OVERVIEW

Mini-Circuits' ZVA-24443HP(X)+ is a wideband low noise, medium power amplifier, operating from 24 to 43.5 GHz. This model operates over a single positive supply range of +10 to +15 V, allowing users to choose their desired operating voltage. Internal DC-DC conversion circuitry maintains consistent efficiency over the full input voltage range. The amplifier incorporates several DC-protection features such as over-voltage, reverse-voltage, and in-rush current that protects the amplifier from damage if mishandled during operation.
