PRODUCT OVERVIEW

The PMA1-14LN+ is a pHEMT-based low noise MMIC amplifier with high IP3 and flat gain. Operating from 0.05 to 10 GHz, this amplifier features high dynamic range with typical 1.1 dB noise figure, 22 dB gain, +21.5 dBm P1dB, and +28.8 dBm OIP3. This combination of performance makes it ideal for sensitive high dynamic range receiver applications. PMA1-14LN+ operates from a single +6 V supply, is well matched to 50Ω, and comes in a very small, low profile 1.5x1.5 mm QFN-style package for easy integration into dense circuit board layouts.

KEY FEATURES

Features	Advantages
Low Noise Figure, Typ. 1.1 dB	A 50Ω matched low noise MMIC device enables low system noise figure performance without the need for complicated discrete-based solutions.
Low Power Consumption, Typ. +6 V at 61 mA	At only 61 mA, this amplifier is ideal for applications with limited available power or densely packed applications where thermal and power management is critical.
1.5x1.5mm 6-Lead QFN-Style Package	Very small footprint saves space in dense PCB layouts while providing low inductance, repeatable transitions, and excellent thermal contact with the PCB. Industry standard packaging allows for easy assembly in high volume manufacturing processes.
