FUNCTIONAL BLOCK DIAGRAM

PRODUCT OVERVIEW

Mini-Circuits panel-mounted structures provide clean, organized management of cable runs and connections in complex, high volume test setups. Multiple connector adapters, power splitters, directional couplers and other essential RF components and test accessories can be integrated efficiently within the test system. Custom configurations are available upon request.

ZT-299 integrates 4 x 8-way splitter / combiners on to a compact panel requiring only 1U of rack space. The wide 500-6000 MHz bandwidth of operation covers a key portion of the cellular and satcom signal frequencies with low insertion loss and high isolation between ports.

The panel is configured with all SMA RF connectors on the front for easy access within a rack-mounted test environment.
